

**PureSphera**  
Leader in GHG reductions

## CASE STUDY

# Buyback of environmentally harmful gases

### CLIENTS

Baulne and Actair

### GAS CATEGORY

R-11 originating from hospital refrigerators

### ECONOMIC RETURN FOR THESE CLIENTS

\$3/kg, in addition to avoiding paying \$12/kg to offload it to their regular suppliers, thus representing a gain of \$15 for each kilogram of gas.

### ENVIRONMENTAL BENEFITS

These projects prevented the emission of 8 362 tonnes of greenhouse gases, which is the equivalent of removing 2 400 cars from the road during the year.

### PROCESS

Clients participated in telephone and e-mail follow-ups and provided the work order (batch technical reference documents).

“ Through this process we were not required to manage the transport of these gases, and we generated an economic return while contributing to the fight against climate change.”

- **Michel Chagnon**,  
President and CEO  
of Actair

**The gases admissible for participation in this program are:**

CFC-11, CFC-12, CFC-113, CFC-114, R-500 and R-502.
